

The goal of the app is to allow many demographics an accessible and simple way to read and interpret the 2020 election results

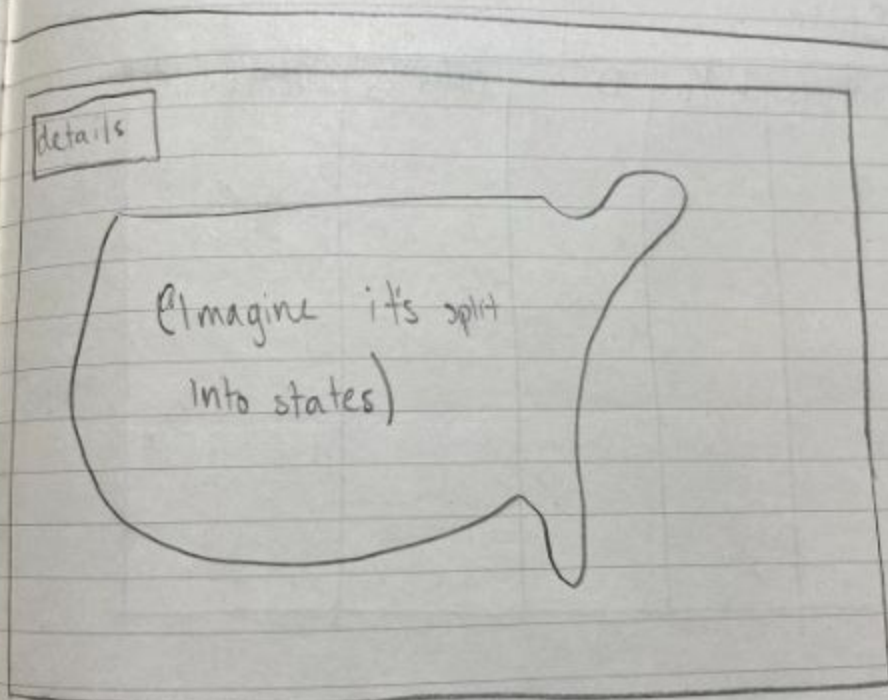

Team Generated Feature List:

- Map of results
- List of votes by county
- “Simplicity Button”

Solution Sketches:

The Map

- A simple map of the US
- Should show the election results by state
- Be easily read

- Possibly make it where if you hover over a state, it shows the details in the top left

Votes by County

- a list of all votes by county in a state
- This is shown when you click on a state in the list

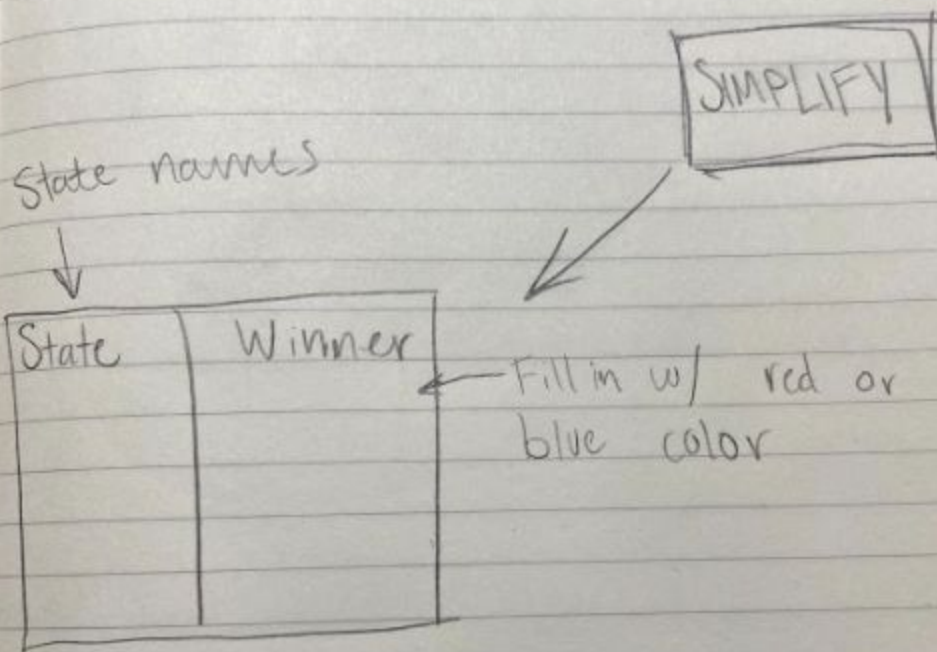

State

[illegible]

- Should be clean, look good, and be very simple

Simplify button

- This button would simplify the UI displaying the info

- Pressing the simplify button would update it to the UI above
